These randdunes are rather more densely covered with vegetation than those at Muscature, and somewhat resemble the pasts of the sandy areas at Chicago which are covered with larger seculs and mall trees, - with the more Xeroplytu opening here and there. In this part on Crepel Ist. the planting of Testile Prue and Robins has abjected the appearance and Dr. von Degen says that the sand puster at Magy Myer are just like the Crepel area with the

d'esten ("rice and Kobinia remove) Dr. von Degen doesn't regard the sand-pusten, - On real pusten, as equivalent o The sleppe because there 10 no summer resting period. He applies the term "pusten to these sandy areas, such as on Eschel Isl. and at Magy Ryir He calls the salvarees "salt sleppes because they have a summer resting period during which the vegetation. almost disappears. The prevailing winds trees, according to Dr. von Degen, are From E, to West others was a great. The rank is at surface, loose, and practing free from humes.

We returned to Doroksar Took denner at a restaurant, and then wend by train to Kunsentmiklos, to see The "sand-sleppen". This is couthword We passed through a broad, nearly blax plane, which is locally more or less sandy. Nearer Budapest is is very sandy, and there are many vineyards, about 13 yrs, ago The Phylloxera destroyed the irregards on the rules, and the wine-growers came to these sandy flairs. Southward there is risher soil, and the country has been Long cultivated, It much resembles

our Wiscousin or Jowan prairies, even to the ocallered groves and fields. It works much like testien down, but There is alle corn, wheat being the chief crop, with some vals, The wheat narvest is now well on. onis plain runs to the Danube and the latter flows along the west bluffs evince rise to the west. Occasionally on This plain there is also a poorly drawed track. dere am here sandy humandes also appear on the richer plain about hal, way down to Kewanduntitos sally spots begin to appear in undrawed places. Ut the station of Kiskum-Lacghaga

took photo 28 Cooling E. across the cultivated plain, The rows and groves of Robinia psendacana, scallered about over The plain, look very wie a like travie groves. The station is some distance from The Cour of Krinsentwiklos, which is situated on the banks of a large salt basin (og lake) in a great, flat plain. We walked in the direction of the town, There are sald flats, surrounded by cultivated field, and there are several wind miles in noux. We note the following sals plants, and Those marker & were collected: Lefidium perfoliatum

Hordeum Onours spinosa arlemisia dolus corniculatus achelea collina Beck * Clantago maritima x Lotus tennifolius (yellow) x Agrostis al ba x atropis limora x Le tragonolobus siliquoses flo rela x Onouis pannonias x testura pseudovina Hark. x Podospermum Jacquiniana X Scerpus maritimus (very common in free please) x Manunculus x Plantago Tennifolia nare x Trifolium foragiferum L.

x Chalurus farmonicus x frances compresses x atriplex tatarica x Erythres men & Plantago majer & doline perenne x Matricana chamomilla. x Medicago Cupulina x Lepidium crassifolium Camp com ovata x astragalus austriacus Ceratodon purpureus (mon) Photo 28 - Saline flat, + field beyond, and white the cons white "blind shot in fore. The their exposure. Huy are reallered, few, and all broken, wither by rough tills rise much above the celian handling when laid down, or by the in all probability the was up subrement cracking y he material, in Clauber Jashin, muly low stratific Photo 30x - Lubing west at (c) (22 5+) which because hard, and checks, on exposure to drying. Expone to show stratification falls sier, dratigier above, as in preading rections. 11/1/ Lineurs Photo 5 (Same) 32 - 1/2.

I found a few shall, mostly broken, and chiefly in he med sands. Photo 2 - do far honer well beyon at 11:34 o returnes to Ceizel, and to Budajers, reaching Eatler at 12.10 pm. i then look a train at 2:05 pm for ax 540 Ru, we passed fine files of wheat on flat folding. The harvest is on, and the wheat sheaves are filed up in curious cross shaked shocks. there are white washer horts & thatcher roofs in velage just w. of this great. field. Our first dop after paring then great field was at Bruck-Kiralyhida! It's the first station west of the village

which is west of the great fills. Here we begin to me the rooster beallies & the holice, The inscriptions in cars are: "Opasno van se nagnuti. " Nicht hinausbengen. "E pericoloso spor gersi. The name of Buchares is fromoreneed "Buharest" inthe a slight roftening as the first station w. of Bruck I note the shocks filed up so: Illy grain is always at center, Culls onliverd In some cares there were ever three on a sow:

July 6, 1914 Monday.

as far as com acc. the harveilies was done with a crade, Saw threshin machine at one place. At for Dejon (old me and They cance not me a gribullural machinery lierance the how no me I repaired.) there are some very Carge continuous field. there are alternation long strips on corn, vals & where, - 4-16 . Lows of sheaves to a strips, Looks well everywhere is far es yuld goes. In the Rustman part Chine are no leouses on the farms, as in Jungary. We parced a giest centery on M. Reacher Vienna at the Care church.

Reacher Vienna at the Form., v at once took car for Pelihangane

Visited with Paul v Beilla will 13:30 acu, when I darled on Aprils to meet Dr. Bayer. He day is fine and clear. Heligensladt the intalion out, shows loss banks, - seem to be large. at Kritzendorf there are some banks in side hill gulleys. The water of the Danube is yellowsh, with a blush cast. Flags, sed above, while below, appear along the river. Loes bowles appear ar edge of plateau at Konigsbrunn Haterstockostill The Cower part appears alralifier, as at People. These banks are on the right of the RR, going out.

The next stop is at Kirchberg, where lovers is about name. The banks are 1. of RR. The tremed weak a troat dialed, vogst, Elwo There are also in banks at Hader, dor, - good. The hills along here are all Terracel out loss, exposed in vertical cuts, slands well. There are some terrains at Gedersday. at Rohrenson it is frieg and the lerrais are nearby. They now all along the bluffs here. In places rock ledges project out above the Louis Cerraces. The wells lowards Kreins are lower and farther back, lent still terraced. the terraces evidently sland well. The immediate vicinity of Freme is

Beyond Krews the lerraces are walled with with, the notes trung Loday. Trapes are raised everywhere to on their terraces. Beyond Unterloiben There are mins of an old castle and walls upont of works. It is raid to be Richard Cound aious eastle. It is gust at Duruslein-Oberloi sen. The part of the new above Krews is marrow and the country is rough and ficturesque, Below Krenes the valley is much broader! Casses through tunnel gust organs Kremo, and This barther on. This fricherence region so he Wachan I met Dr. Bayer & the English speaking consul at blity, and had a chat with

them. They informed me that Dr. Wolf & Mengel were coming to see Prayen rections about the 15th of august. Left ax 3:14 P. Me. for Kreus, where I changed to a trema train a slow, slow, bram. On way look photos: Photo 23x - Hills across the Darube, hearly hombered with conifers, opposite Werssenbirchen D Wachan, - at Stein Matern there is a large carte across the Darmbe, somewhat distant. Photo 24 sported. Photo 8. Terrace hill will grafes at Klein-Maulem. Choto7 - Terraced Pous tuces at Robrensdorf. It shows terrous best.

De crossed bu Dambe near sulla. The water is yellowsh, and rolls Pele l'ax of the Missouri. It greefenslein there is some Coess up on rody Cedges, Below that it seems to be their all the way down the stopes. Mere is also Coess at Hoflein a.d. Donau, as Kritzender Chere are rock Ledges with loess". Mot very good! Tilted rocks affear in ledges in Chiffs below this pourt. the best loes banks seem to be at cheiligensladt. In the evening the Shohan called and we spent a good nature, chatty evening.

July 7, 1914 Juesday

We made preparation for the final going, and left at 900 an for Olzen. The train was crowded, so we sewred a 2" class place by bepping the conductor We had a comfortable side all the way, but had to reheat tip (to another conductor) beyond Greent (= Graind), from near Borovany. at Borovary there is a hostine hear the track, named It Jana Zizhy z Frocnova, Fromor is west of the truck. The country have is volling, with much tunber and man fish ponds. Both indicate pour soil and the holding of large areas by a

few individuals, From near Budejovice we could se Sumava, forested mountains, to the southwest. Budejonce shows signs of much industrial enterprise. Beyond Budejovice there is more cultivated land, but also many fish bonds. The country from Aluboha beyond Nakri-Netolice becomes flatter, and nearly all of it is cultivaled. A good view of Sumava is obtained from Codrange RA Prolivin there was much washing out on the grass. The women wash in the stream Lowards Kazice there is a rolling plain

Beyond this to the southwest the wooded on mountains come close up to R.R. ax Strakonice there is an old church west of track. This is quite a lown. Saw sellers and harrows used in fields alm the way There are wooded hills to west all along to Horazdovice. there is a fine view of Sumava to the southwest beyond Horazdovice. ax Report there is a castle on a wooded senow. at Stahlava, to the west, there are runs of the castle Lopata en a wooded rill.

, and Me reached Olzen at took a street can for the Artel Sudoda where we put up. () fler localing, we walked, out and foots some photos. Pholo 30x - Radrice Mara V Plym. Photo 27 Trostel or Michilase Spoiled Pholo 5 - Dog team and driver, these dogs cost him 400 K. Called on Jahrle Burray, selved policeman now serving in city Catherine. Se is 75 yrs. old (July 8). Kral mne leg sdelil ze kostel Dr. Crotospa slary kostil v nemy olee a malka tyli segdani) byl nee ryhorely 1, 1898, av 1.1899. prestavovan, avsak celken je negmenen, - loliko zevrejsek zmenn I then took pholographs of the interior of the church pholos, 1 × 2 (IV), chromo-isolars, and the also pholos 3 6 (showing Pansky Dum of which my father used to speak. This shows the patern of the old houses in one of which, not. 3, facing the square, my folks lived. Between this Vausly Dum and le lace store is a marrow street, -

Postynski ulice, - on the right hand side of which slood the old house 9 + 10, now realaced by a store building. I look photo 7 of the present brilding, the business of Kare Karasek, and to the right is a collège like the old ones used to be. also tried to take photo of present Mr. 3, - The store building of arnost Slapl (dry goods) but this was spoiled. He then took dinner at Kura; hotel, and after duner I went to the parsonage to get the records concerning our family. In the matrika I found that father and mother ivere married June 20, 1846, by Rev. Jan Pauckert, farår.

Fathers age was 24, mothers 27 yrs. The record reads as follows: Franz Schimek, mestan a obuvnik ve Vamberce, manzelsky syn Synace Simka, obnomba z Castolovie, cis, 92, a jeho manzelky Barbory, rodem Jana Matouska z Castolovic, Marya Sitt; manzelska dæra Josefa Ijtta, obuvnika a mestana ve Vamberce, c. 161, a jeho mangelky Marie, rodem Jana Kubiasove thatce ve Vamberce, c. 174. (V dobe anatku trydleli v tis. 17). K snalku mela svolen vrchnosti, coz ylo v dobach roboty milne. Dalse matriby na fare ukazuje

ze olee byl rozen 25 brezna, 1822 a oter jeho tyl I gratz Schimeck. Ta strance 43 stop o make: Marje deregie, - r. 1852 vyzvedla krestin list, Rozena i unora, 1819. Otec Josef dit, matria Marie detova, deers Jana Kubiase. Marodika de v c. 163 (staré). Marie Dimkova, (sestra moje), byla narozena v ciste 3, due 7 kvetna, 1847. I then took the ont- f-dow pustos listed on p. 163, I learned That a Mirs, Rubin. in Vambera is related to the Lits. Mrs. antonin Bednar, starosta, komerem rada, tovarna, is also

related through the "Kuras", distantly. I bought cards and pictures of Vambers, - me urthe fathers old nome as it appeared, - and also tried to ing a tripod, but the serew ded not fit. It was sent to a machinist who bringed it so that I could not use it, and I had to heave it. We had hired a hear to take up to Castolovice, but the delay made The Tris impossible (and a heavy slow brewing made is underivably and the trip was given up. I then took photos 8, 7, 30 (and old collage at ew of www in which fathers house sloved, - and like it, 27, and 4. Choto 27 shows The bridge,

Clater Jum fathers day, looking E., with statues or sides, beginning with S. Cyrill at the left, and with S. Method on the right, Nedrok a train for Doudleon, where we at once carried to be train going Towards Prague. (and. and Poerling went on & Praque, and I Kolped off at Castosvice. at a little after 5 Am. Vamberk, am told, has changed much because of industriel development. It is formous for it have work, and is to cereine The anniversary of The lade who started the judustry.

Morked at my room and also visited a

In the afternoon I went up town, To Choderas pertaurant, and met who came from to ne Vaul. They are related to tie mother. They are fine people. The daughter is an only child, and intends to enter the University. The father is in Cusiness, the wisker to go to america, our the parents object for business and family. reasons. She is a fine intelligent gard, and it would be a fully to throw her away to some man under the present voicel conditions. I returned to the miverity to

mee; Mr. Grazen and get the negatives, and her returned to the Overni Dum just in Time to calch the bilas, who were with Paul and Berlia. They left at 7 " Pue, I took wifee ad Mestanska Jeseda and went have and early to bed. It driggled part of the day, especially in the evening. When we parted with the Silas the daughter cried. The wants so much to gots america, but The parents object, the father is evidently very indulgent and thinks much of his daughter, but he cannot see his way clear to permit this. and the good girl will be lost here!

(min 17, 1914 Friday. c spent the forenom at my room and with fig. Lewer and Mr. Mrages, while there and can went out. Ne Took dinner Bestla + I at the Vicestansha Beseda, and I allended to banking, It sained much of the time. Flic Bank flaid me 241 K. for 10 L, and for an additional 52, 120,50K, - a Total of 361.50K gn 152, We went to Aradiany and made the rounds of the church and the main halls, and Beloedere. We spend the evening, on the return, at the Elavia reslaurant mean the Marodui Didvadlo, where Dr. Pello joined us. Ne was quite.

jolly, and appeared to be ready for any rost of a lack. He and Vaul have struck up quite a comradeship. after spending a pleasant. wiral evening, we started for home. On the way Dr. Velle suggested that we vind flets, The chief drinking place of Prague. We merely walked Through; That was enough! The place is roomy, with all serts of tranches and corners, The tables are crowder in, & every wace is occupied. The cielings are low, and the air heavy with surske and bar breath. And here These beeple, men and women came to sit by the home. Usually a particular company selects a particular evening and table after a certain home (1/P.W.!) no more orders as taken for her but the quests order as many players as they risk before that home. We wont home July 18, 1914, Salurday,

We packed early for our trip into Germany and Surlzerland. I saw hus Mragele about Leveloping regalives after get vack, and visited wille Di Domin, who gave me fuelle assurance has the maller of my (h.D. (honorary) will progress salispactority We look our grips and went up hou He had dinner at a restaurant men the depot, and left at 250 MM. for Dresden. Vaul was slipped at the depot, as he was about to board the train, by a policeman who bried to arrest him. Probably Paul's completion and appearance onggested a Serb, - or the officer was on the wrong occur. He reluctantly released him in time for the train.

Ne traveler again over le familia route to Vodrudeli, but the whole region Gad changed. When I came in the oping everything was just starting, - now the trawest is an, The hop vines are greatly developed and form a conspicuous part of the plant covering, - much of the fruit, then is flower, has been picked, and there are many organions of the approach of aulium. It was quite musty, and later rained some, so that the view was not always good. We note particularly the old rund carlle of Strekor just before are reacher Usli. Usti itself is

fine with picturesque cenery, an old church, nearby runs old castles, ele, & i, worthy of another visit. We reached Dresden at 650 Ru. and put up at the Seidel Cension, Luttichan Strasse, 20,30, and for from the depot. We sow a Geppelin airship circling about over the city, a great Cumbering thing with a lot of room for passengers. We look a walk to be Terrace along the Hor, - as indicated on map of Dresder We passed Lieben monument, and that of albert, King of Saxony. We passed the Market Building which That a great painting on onlie walk showing mercession of jules! In the viewly of the statue of King

July 19, 316, Sunday.

Albert are localed the act Museum, albeilinum also art; largely statuary). Recon the river we can see the government buildings. Naw the Ceppelin again. a violent storm is trewing, and we harried back, It commenced to rain, and we relied to a restaurant for supper Here we had a little difficulty because The waiter torong of only two suppers for three people and claimed has was all that we ordered. On the way to our voious we slopped at a shop to buy postal cards, that as it was after the we had a cloud on the offered in the raine because it was against The rules to beef open after ? o'clock. Finally reached our rooms and I went to bed early.

Ne took a morning was to through the park to the Good opical and Probanical garden yand then went to me ant gallery, where we spent gome dine ou sia mining the a read collection of paintings - many of Them said to have been necured try the for and solbery in conquest. The gallery contains the world, most is amons painting, - Kafaels dixtine Masoura and child Before this paining we med it weard and Two luches from the trivernly. There are wany English greating. people in the crowd. The gallery is large, with many rooms, and is described in the guide which I seared. Bertha was taken sick and went

to her room, Cant and I look. dinner at the air to Reslaurant (Variani, where i forgot my camera, and sad to return for it 6 m le Cension. These baxons are more conjecual and less overbearing I have the Frussians. We went to the depot, and had to waid for the Bertin Frain usatil 426 Ru, o gent and portal carde from the station, The trip to Berlin was very or hivary. The fields are ripe and everywhere the harvest is on. He reached Berlin at 6 PM. and fout. up at Hospig-Pension und Stole! Stadt

Dresden, of C. Uhlig, Berlin SW. 11,

We took a walk along Friedrichstonse and Miles den Einden in The evening.

Bertha and went is lender den Linden (Paul was with us a back of the line to take photographs the rearned that pudography in the streets was not permilled except by permission of the police dept and or inquiry found that its only Gurhore was to prevent Docking. of four dreets. The police both on Unter den Linder am Lieger allee permitted up to take photos if we Kept of of the busy lines of traffice. We washer towards the Royal Palace and o look pholos 5, 6, 7, -all Reich's Vienna plates. We then walked to the Dieges allee and Took photos. 8, 28, 1,2 and 27 ...

(my 20, 7. 2

Photo. 28 is of special inverest. In shows the row of statues on the twest side of theges as see. The first in the preliere is that of Frederick 12,1440-1470 the next that of Frederick I, 1415-1440, the third that of Kaises arguind, 1378-1397 and 1411-1415, and the fourth that of Kaiser Karl IV (our Karel Velly 1, 137-78. The line of statues begins as the north end on the west ride, was the Column of Victory, with albred der Baer, 1100-1170, who holds a cross aloft, and has the busts of two vishops behind time. The line then runs chronologically to the south, Frederich IT being at the south end of the line, Thence

Live the same with on he East nide, and end: with imperor William der inosse I, with the first of Paismarch and in Molkey just opposite a Brecht der Baer. after dinner we went to Dahlew of rark. Beilha & Paul woul in the (Filarmacological is slitule, and I to the Bolanical Farden Dahlem Bolanial Farden. These gardens were developed under the enconvagement of Emperor Welhelm, who wished to excell the Kew Jardens. Weither he, nor the bolavists, seemed to consider, nowever, that the randy region about / Derlew is very unfavorable To an all-around garden. Special enditions, much as soil-beds, rock heafs, etc., weil created artificially at great.

expense, but even this does not overcome til handicap. I called at the homes of Do, Geheimras) Engler and Dr. Diels, out weller of them at home. I then strolled about the garden and made mis cellaneons observations. The plant houses have blines of slats, wired together, which can be drawn up on rollers. The walls of the planthouses are of brick, and have venticaling windows in lower frant. In the houses with repright walls canvass curlains are used. I Lection of a tall house, -The central frant for falus etc.

the surface of the grounds is quite irregular, - laste original out targety artificially creates. an interesting feature of the gardens in the development of beds for special Mudies. a. more delailed grouping is shown in the description of the gardens printed, out I parlicularly noted the following: - a bed demonstrating Geobropism, Heliotropism, anisotropism, etc. the latter, for example, under a - box like cover, ofen at ends. - a bid showing change in position of leaves, day and night. Here are Oxalis Seppei, Chenopodium album Stellaria media, Irifolium rubens, etc. - a bed showing abnormal green "flowers", etc.

- a series of bels illustrating various types of pollination, as: flowers with exposed nectaries, flowers with concealed neclaries, Limosphie Glowers, etc. This is a fine feature of bu garden. I went out and look photo 27, "Muter den Pichen, the street in Growt of the garden, This was a row of nice oals on each side, and the street railway runs in the curb-parling in the sides, - not on the paved street. It is a fine evenue. I returned to the Garden and found that I am am Bestina had come in. We walker about the gardens, giving special attention to the ecological part, which soms

to be wholly an effort to new Want goog when by groups of representative pelant. The piles of livedone, cave, grantie rochs, ele., sometimes with tricking water, and sometimes dry, Jurnish a variety of conditions, and special soil beds privide till other variety. The pile of rock showing the Cancasus k lora is jue. An australian section as also noteworthy. The earth and rock in some cases had to be hauled from great distance disty men are now required to care for the garden. This tras been and from 100, formerly employed. on man case they temper the light autic plant houses we a streak

- inche fans fine: The Paint. The gair herjer l'ord in link. Dv. Engler war expected to lake oney a class anto The garden ax 6:45 me a wailed, but was told that he observed the "akademische viertel, and would be late However, he came into the private entrance from his villa, and disappeared in the mages of the garden with this class as it was tale , could not take the time to hund arm up. We returned to Berlin, and after supper called on Dr. v Mrs. Seo. Smill. Shull has been in Berlin since last fall, and is writing his Burbank report.

July 21, 1914, Juesday. Offen pine delay, -a shave and. Jon Darriem a gam one of the work hubble place.

I went to be bolanial (minding)! next is the garden and from Die Dies, de in a sery general, iver energelt man, and trested ine with great courtery. He had a lengthy conversation enverning ecological maller. ove suggested that at table there a se still remnants of steppes. Olso in a sand stepper near the lang and Bingen. Le Coaved me a sulitare map, and an ecological map, of the vicinity of Mains, and suggested that o go from maing to MoniBack, and then to Heidesheim and Budenheim

Here are tertiary and delived sands, with remnants of he old sand-alike Gera. Le suggeste that I do not attempt to photograph at Mombach, as this is a mulitary drill ground. He also mygeslel that I get senneckes paper on the Sand-flora von Maing, de also anggester son, Aurherland, as a good place. He offers to send a Jerman herbarium for sets of praise Courts. He also wants my praine papers. He also wants notes on work un the Laberide Laboratory. The work in the department of Holany is here mostly morphological. and laxonomie. The physiological

work is done in a reparate sustitute by all chaire rands. Dr. Diels would southwestern desert malerial, acorns of oaks. The also mygests that I kublish a description (comparative) of the prairie The sand and salt-pustas of Hungary, and the steppe remarks at braque. He also suggestes that I send pauphlets Saws, ele., concerning conservation, to Dr. Conwerty Convicting Berlink. Grunewald Nr. 77 Dr. Diels Then showed me about The brilding. The herbarium is very

large, and occupies from hories of.

the building! It is wholly systematice.

The story is devoted to cryptogames.

There is a good uge Laboratory for laxonomy. There is also a large nurseum in part semi-popular, with wood sections, fruits, products, ele. Dr. Diels said that this is befit up for popular use argely, as they must please those who Gurnish the money! There are cases that show tree. brunk, root, fruit, leaves; parasiles el. - also picture of tree. ere suggester that fine large plant pictures emed be purchased from Neve Chotographischen Jesellschaft Berlin - Steglitz. also colosed scenes of mountains, etc. from. Menker & Uslermeier Dresden.

We then look a short a sout he ga: deus, girme cine a l'entime à The prairie section. This is radly confused, plants from the plans some sured with hore of the prairie, The bed Cack altogether the askert of the prairie. Many of the plants are melle wrong relation: Rhus glabra with Wants of open praine, Teleopsis in the open (where it is not doing well); et alloge then the asked is more wearly that of some of the langled prairie borders. o greed to sent seeds, with delailed descriptions of habitats, and will notes on the grouping of prairie plants in dry and wetter situations, on loss, sand, ele. This was a fine visit.

I then called at the Plant Paysidogy Sestitute across the way, but Dr. Haberland was out Ceeling somewhere in Berlin, and i did not jud him. The junter took me about, and was able to explain the various barrialones ele, as he is evidently also the Diener. Dr. Haberlands, who is also a Jeherman, has a finely equipped office, and private laboratory, This is on main first floor (not larguent), Here he has three laboratories in line in M. whe. There are for microscopie work, and his physiology is evidently largely morphological Los had been anggested or Du Diels).

fiere is also a fine colume room. will raised scale, a case for charts, or the chart are rolled up and not up ment and a case for models win a show fibrovascula sandies, els, els. On the 2" flow is not him where Divabelants office is I am quite on we had no, and has the lecture wom and laws, are on first floor the side). on a. ride Dr. Tullenberg has a The al microscopical laboratory, and separale paraffin room. Also an e office or private room. On the 3rd floor, north note, are the docento rooms, and a museum room, in which there is not yet much in the way o' collectioning some woods, Gruits and wollled materials.

On the tothe flow There is a photo room with chy light, and a dark room, On the 2 the floor on he South orde. there is a chemical Patoralory with hood, spectroscope, scales, and work-tables. On the first floor on the Sinde is the library, and also wing it, a reading room. The library is fair, but the reading room is small. If is evidently intended only for advanced students. the basement is high and mostly well lighted. On its north whe are two physiological laboratories. These contain rotation tables, etc.

hey to were, on a west in a journall experimental plant house, built as an anner a orde of milding, equipped with relligiouses, ile, the lables in las, are covered nothe gray lindeum. on the fing woodical cavoralory there is not a large amount of glass ware, - l'étave as muell. an anxomela is nex up, there are karne accurate transpiration ocales which will lake plants / melei light, and some other apparatus, tout mos a large amount. On the south ride of the basement there is a uncological laboralory, not yet much eguffed, in which Bacteriology is also to be included, There is also a garden and small

plant houses on a outside. This builden is notel and rome east, acron the street, from the Bolanical Museum of is new, and not yet fully equipped. Dr. Diels informed me that the grounds hereabouts were first public (royal or state property. It was decided to sell out, but reserve a part of the land for the garden and some public buildings, The departments of Bolany, Goology and Geology will be located here, it is expected. The humanities will stay in the old brilding in Berling. also medicine. The ground here is somewhat rough, and is the boarness around Berlin.

returned to Berlin at 2:45 Pm, and recured a knich at the Consion it then packet up and left for æipsis at 6 28 P. M. Paul die not get his landry, and arranged to have it news to Sem. The country from Beelin to Lippy is a flat plain. The harrest is on We vaw an aeroplane near teify. We reached Terpzie ax 840 Ville, and put up at the Kistner Vension, - a very pleasant, homelike place I stood a long time on the street - at Augustus plats, before faul and Bertha meceding in finding the Place. My pile of baggage altracted some attalianoso late in the evening. While waiting I noticed that young fellows to tried to make up with garls on the street uniformly failer. a better los than in Berlin! July 22, 1914 - Wednesday.

I started out alone at 815 alu., Berthe and Can't going after heir respective interest. Cant dubs Be the The Muslum Checialist. and alle relorts That his only reverest in dirty willes and asvaloine I called at Man Wegs book establishment, and recured be. addresses of German, Ousbrian and surs bolavido which had Eft behind . - Jook photo 28. Then went to the Prolowies Gusden and called on Dr. Ofeffer a venerable, fine old man with whom I had a pleasant conference. He wants the Prairie paper, one had examinations, and so, a rranged with one of his young assistants

to show me a mit, we used fair Con guissa. They have had this year about 380 students. On the ground floor there is a small follow house in S. side of Coulding an annex to it) for soil experiments, etc. Hearby is a small store room for ceeds to be used in experimental work. Rest is a dark room, about 10 ft. ognare, with spectroscope, electric light, etc. along the corridor are cases for chimicals, centrigal machines, and morphological apparatus. There is also a case resembling an icerchest in which charts are keft, - rolled up and set up on end. There is also

a case for transfirmation appearatus The lecture room is quite large, and contains a fine projecting apparatus of Dr. Viellers own desir. Charts are evidently very much used. On the north ride is a small believe room for Bacleriology. There are special rooms for electric experiments. East of The small lecture room is a small Caboalory for beginners in histology and physiology. There are many cultures of algae injen for experimental purposes with light, ele The south part of the east end is devoted to advanced students: Here There is an apparatus for throwing spectrum om slide, under dark

hood, and observing he effect altraction of of different colorer light on algae, On east side are two converted Saboratines (not large) for advanced students. Then south on he easy whe is a small chemical laboratory, and sterilizing apparatus. The upper story is devoted to the name evidently sumpluous) and private laboratories of Dr. Preffer, On the north side of her basement is a small, cool plant house attached to brilding. Here Dr. Pfeffer is just now working with auxonometer) on the force of drooping of leaves in sleep. The petioles are stiffened with

were, so that only drooping of blade. is considered, and a fine livere is placed Maraghe Clade, and passed over fulley of auxonomiles. The Che Casement is a store-room for glass ware. Aludents pay 3 of the breakage. Some department, like Chemistry, charge full price a dark room for prolography m East a small cool room, with cooling chamber in a donble waller vox, with packing. Cooling a store room for Bacteriological ware, etc. Il work shop, with necessary machinery and bools, vices, etc. a constant lemperature room in

the basement, with our electric Circumostat, - 1.8. one making and reaking electric convections. This is pett ax 28° C, (=82, 4° 7.). There is a special furnace for nealing, and cake is used. The mechanism him the hot air in or out. a gas-motor room contains presses which are capable of producing pressure of 1200 almospheres. Un ice chest ilands in the hall. a distilling room with automatic. distilling apparalus. I cool room for paraffin work nu warm weather. a special laboratory in which wow on advanced student is trying & determine the effect of acetylene gas on plants.

A rominains appliance for grick healing of water, Relarge gas flame heats water passed arough a slender coil, a small room, on west side, for photomicrography, works with ultra rays, etc. 3 The plan of the building is here down: Epp. Plant house (cool)

Dr. Pfeffeis laboratories are equipped with a great variety of apparatus, but most of the apparatus is simple and of his own designing and have make.

I returned to dinner, so the gardens are closed from 12 to 2,

Often dinner we all started out for the Partier out

the intention of going on I be book of rinting a historian and the great Denkenal created in monory, it the German Custian and Russian who fell at the battle of acipying.

I took photos 7 and (in the garden)

In and 3.

The Bolanical Garden is not large.

There are small systematic groups

of plants, and presall na vitat group like Caelaciae, Jedum, etc. We then walker lowards the Denkmal, and stopped to take photos, 4 and 29, of the Russian Memorial Chafel. I damaged my tripod here and returned to the city for repairs, while Bertha and Coul went on. Leipzig is a clean place, The people seem very different from home of Berlin, - they are cleaner (morally) and less pompous. There is an intellectual almosphere about the city similar to that of traque. Spend the evening in writing, and in fracking for sommons. early hip to Halla.
